

Prescription (Rx)

Patient: Matthew Clark

Age: 77

Date: 2025-07-11

MRN: MRN100012

Diagnosis: Depression (ICD: F32)

Medication and Instructions:

Prescription for Depression

Patient: Matthew Clark

Age: 77 years old

Diagnosis: Major Depressive Disorder

1. Sertraline (Zoloft) 50mg once daily in the morning
2. Mirtazapine (Remeron) 15mg at bedtime
3. Lorazepam (Ativan) 0.5mg as needed for anxiety symptoms, up to 3 times daily

Instructions:

- Take Sertraline in the morning with food to minimize gastrointestinal side effects.
- Take Mirtazapine at bedtime to help with sleep disturbances and improve mood.
- Use Lorazepam as needed for anxiety symptoms, but do not exceed 3 doses in a 24-hour period.

Follow-up:

Please schedule a follow-up appointment in 2 weeks to assess the effectiveness of the medications and make any necessary adjustments. It is important to continue taking the medications as prescribed and to report any new or worsening symptoms to your healthcare provider.

Patient Instructions:

Hello Matthew,

1. Please remember to take your medication as prescribed by Dr. Stephanie Lewis. It is important to follow

Mayo Clinic Northwest

654 Wellness Circle, Healing Heights, WA 98101

the dosing schedule to ensure the medication is effective.

2. Keep an eye out for any potential side effects such as nausea, dizziness, or rash. If you experience any of these symptoms, please consult Dr. Lewis immediately.

3. If you have any concerns or questions about your medication or treatment plan, do not hesitate to contact Dr. Lewis. She is here to help you and make sure you are receiving the best care possible.

Take care and stay healthy,
