

Prescription (Rx)

Patient: Liam Patel

Age: 82

Date: 2025-07-03

MRN: MRN100015

Diagnosis: Arthritis (ICD: M13)

Medication and Instructions:

Prescription for Liam Patel, 82 years old, diagnosed with Arthritis:

1. Naproxen (Aleve) 500mg tablets - Take one tablet twice daily with food for pain relief and reducing inflammation.
2. Acetaminophen (Tylenol) 650mg tablets - Take one tablet every 6 hours as needed for additional pain relief.
3. Celecoxib (Celebrex) 200mg capsules - Take one capsule daily with food to help manage arthritis symptoms and reduce joint stiffness.

Please consult with your healthcare provider before starting any new medications and inform them of any existing medical conditions or allergies. Follow the prescribed dosage and frequency for optimal pain management and arthritis treatment.

Patient Instructions:

Hi Liam,

1. Take your medication as prescribed by Dr. Anderson every day at the same time.
2. Watch for potential side effects such as dizziness, nausea, or rash.
3. If you experience any concerning side effects or have any questions about your medication, contact Dr. Anderson immediately.

Take care,
