

Prescription (Rx)

Patient: Mia Taylor

Age: 62

Date: 2025-07-08

MRN: MRN100021

Diagnosis: Abnormal Pain (ICD: R52)

Medication and Instructions:

Patient: Mia Taylor

Age: 62 years old

Diagnosis: Abnormal Pain

Prescription:

1. Gabapentin (Neurontin) 300mg: Take 1 capsule by mouth three times daily with meals for neuropathic pain relief.
2. Naproxen (Aleve) 500mg: Take 1 tablet by mouth twice daily with food for anti-inflammatory and analgesic effects.
3. Amitriptyline (Elavil) 25mg: Take 1 tablet by mouth at bedtime for neuropathic pain management and improved sleep quality.

Please follow up with your healthcare provider in 2 weeks to assess the effectiveness of the medications and adjust the treatment plan if necessary. Take all medications as prescribed and report any adverse reactions to your healthcare provider immediately.

Patient Instructions:

Hi Mia,

1. Take your medication as prescribed by Dr. Walker - this is crucial for managing your condition effectively.
2. Be mindful of potential side effects such as dizziness, nausea, or headaches. If you experience any of these, please contact Dr. Walker immediately.

Mayo Clinic Northwest

654 Wellness Circle, Healing Heights, WA 98101

3. Keep track of how you feel after taking your medication and any changes in your symptoms. This information will help Dr. Walker adjust your treatment plan if needed.

4. If you have any concerns or questions about your medication, don't hesitate to reach out to Dr. Walker for guidance.

Take care and stay on top of your medication regimen for optimal health.

Best,
