

Prescription (Rx)

Patient: Grace Hernandez

Age: 74

Date: 2025-07-04

MRN: MRN100013

Diagnosis: Asthma (ICD: J45)

Medication and Instructions:

Prescription for Grace Hernandez, 74 years old, with Asthma:

1. Albuterol Inhaler:

- Dosage: 2 puffs as needed for shortness of breath or wheezing
- Frequency: up to 4 times a day

2. Fluticasone/Salmeterol Inhaler:

- Dosage: 1 puff twice a day
- Frequency: every morning and evening

3. Montelukast (Singulair) 10mg tablets:

- Dosage: 1 tablet daily
- Frequency: every evening before bedtime

Please follow these instructions carefully and contact your healthcare provider if you experience any worsening symptoms or side effects. It is important to keep your inhalers with you at all times and use them as directed to manage your Asthma effectively.

Patient Instructions:

Hi Grace,

1. Take your medication as prescribed by Dr. Johnson, at the same time each day.
2. Watch for potential side effects such as dizziness, nausea, or rash. If you experience any of these, contact Dr. Johnson immediately.

St. Mary's Medical Center

456 Healing Way, Wellness Valley, NY 10001

3. If you have any questions or concerns about your medication, or if you are having trouble remembering to take it, don't hesitate to reach out to Dr. Johnson for guidance.

Take care,
