

Prescription (Rx)

Patient: John Scott

Age: 37

Date: 2025-05-17

MRN: MRN100008

Diagnosis: Depression (ICD: F32)

Medication and Instructions:

Prescription for John Scott, 37-year-old patient with Depression:

1. Sertraline 50mg, take one tablet daily in the morning.
2. Bupropion XL 150mg, take one tablet daily in the morning.
3. Cognitive Behavioral Therapy (CBT) sessions once a week with a licensed therapist.

Instructions:

- Take Sertraline and Bupropion XL as directed without missing any doses.
- Attend weekly CBT sessions to work on coping strategies and improving mental health.
- Follow up with your healthcare provider in 4 weeks to assess medication effectiveness and any side effects.

Patient Instructions:

Hi John,

It's important to take your medication as prescribed by Dr. Anderson to manage your health effectively. Remember to take your medication at the same time each day to maintain consistency.

Be aware of any potential side effects such as nausea, dizziness, or headaches. If you experience any of these symptoms or any other unusual side effects, contact Dr. Anderson immediately.

If you have any concerns about your medication or experience any changes in your health, don't hesitate to reach out to Dr. Anderson for guidance and support.

Take care of yourself and remember that your health is a priority. Let's work together to ensure you're on the right track with your medication regimen.
